## DASHBOARD PROTOCOL

- Display on the dash of all support vehicles.
- Turn on headlights at all times while driving.
- Drive at highway speeds when not following your Racer.
- No slowing to talk to the Racer during leapfrog support.
- No vehicle handoff in leapfrog support zones.
- When stopping, keep the vehicle completely off the roadway (5 feet to the left of the driving lane).
- When following your Racer stay as far to the left of the traffic lane or on the paved shoulder as possible.
- On narrow twisting roads, allow following traffic to pass. You must pull off the roadway and stop at a safe pullout area. At night the rider must stop also.
- Dim your headlights for approaching or passing traffic.
- Your hazard lights must be turned on and your slow moving triangle and Caution Bicycles Ahead sign must always be visible when following your Racer.
- Courtesy is Faster Than Controversy. Wave to passing motorists. Yield to fast wide trucks. A safe race is a fast race.

(Cut the above and paste it on your crew vehicle dashboard)

## BICYCLE SET UP

Every bicycle must have reflective material applied to various parts of the bike for visibility. Every bicycle must also have front and rear lights.

We recommend 3M Reflective Tape. We understand that seat stays and cranks can be narrow. We want the reflective tape to be as wide as possible on those areas.

For wheels, the easiest place to put reflective material is on the spokes. Reflective tape can also be applied to the rims. However, tape should NOT be applied to the braking surfaces.

**HINT:** Consider putting electrical tape or clear contact paper on the bicycle frame or fork and then applying reflective material to these materials. Electrical tape and clear contact paper are easier to remove than reflective tape. Reflective material must remain in place for the entire race.
